Slogan: **Epic View, Epic Details**

Immersive Viewing Experience

- 34 inch with 21.9 ultra wide curved monitor, ideal for gaming or multi tasks work
- The 1500R degree curved monitor matches the contours of human field of vision, delivers an incredibly immersive

Brilliant Picture Quality

- The resolution of the monitor is 3440 1440 approximately 2.5 times of pixel density compared to full HD, provides more details of images
- 121 sRGB color gamut helps to provide vivid color

Enhanced Gaming Experience

- With up to 144 Hz refresh rate, images refresh faster and smoother than the standard 60 Hz monitor
- AMD FreeSync Premium technology seamlessly synchronizes the frame rate output between graphic card and monitor, eliminating image tearing and stuttering

Eye Protection

- Flicker free technology and TUV low blue light help to protect eye from fatigue

Adjustable Viewing Position

- 34 inch with 21.9 ultra wide curved monitor, ideal for gaming or multi tasks work
- The 1500R degree curved monitor matches the contours of human field of vision, delivers an incredibly immersive

Stylish Design

- 3 side boardless display stretches from edge to edge for maximum viewing
- A refined dark exterior and Y shaped stand base bring a sleek, modern look to your desk
